

**DAVID STEADMAN**  
SITE SUPERINTENDENT**BACKGROUND**

David started his apprenticeship as a carpenter working in remote locations. This meant they did a lot of things themselves, from excavation through to finishing. This knowledge gives David a unique skill set that helps him complete complicated projects with both happy clients and sub-trades.

**EXPERIENCE**

Working with Project Managers post tender, David is able to develop a schedule and budget for project both large and small. After a project is awarded, David is responsible for all aspects, including but not limited to; scheduling of trades, ordering and purchasing materials, maintaining the safety program, quality control, and correspondence with architects and engineers.
